

Hemansh Singh

Software Engineer - Full-Stack Developer - Morris

hemansh@example.com | github.com/hemansh-singh | linkedin.com/in/hemansh-singh | India

Summary

Product-minded software engineer focused on resilient web platforms, developer tooling, and polished user experiences. Comfortable moving from systems thinking to interface details and shipping maintainable static and full-stack products.

Experience

Full-Stack Developer, Independent Projects | 2023 - Present

- Built responsive web apps with JavaScript, component-style patterns, APIs, and cloud deployment workflows.
- Designed reusable UI systems, accessible forms, dashboards, and documentation for developer-facing products.
- Improved front-end performance through lazy loading, semantic markup, and careful asset budgets.

Projects

LaunchOps Dashboard: Deployment visibility, incident notes, and release confidence metrics.

DevJournal: Markdown-based technical writing workflow with tags and code snippets.

SignalBoard: Real-time metrics UI for engineering health and product operations.

Skills

Frontend	HTML, CSS, JavaScript, TypeScript, React, accessibility, responsive UI
Backend and Tools	Node.js, REST APIs, Git, GitHub Pages, deployment workflows
Product Craft	SEO, performance, UI systems, technical writing, dashboard UX

Education

Computer Science and Software Engineering - Ongoing learning through production projects, open-source practice, and systems design study.

Additional

Open to internships, collaboration, freelance builds, and technical communities focused on thoughtful software delivery.
